M&P Survey Equipment Ltd promotes the future of Survey and Engineering!

Chester, UK – 19th June 2009 - **M&P Survey Equipment Ltd recently attended the Witton Park Borough Challenge in Blackburn to promote the future of surveying and engineering to young minds.**

Year 10 children of all abilities from various schools throughout Blackburn visited the Witton Park High School Business and Enterprise College to survey an area of land and create a sensory garden as a 'Functional Skills Project' co-ordinated by Class of Your Own Ltd (.classofyourown.com). The children formed groups and 'created' a company and marketing strategy before heading off to the proposed garden site to survey the area using Leica Geosystems survey equipment supplied by M&P Survey Equipment Ltd. As part of the childrens project, the winners of the best overall design will be used to create the sensory garden which will then be open to the public.

M&P Survey Equipment Ltd, advised the children appropriately on how to use a range of Leica Geosystems surveying equipment including optical and laser levels as well as total stations and Disto™ D2's donated by Leica Geosystems. A spokesperson from M&P said "we are proud to promote survey and engineering equipment to young minds who may in turn become involved within the construction industry in the future."

Alison Watson, company director of Class Of Your Own Limited, was impressed by the children's reaction to a real life company assisting with their project. "M&P Survey did a first class job of capturing the children's enthusiasm. It was great for them to jump into construction in such a realistic way. I'm convinced that a different, practical approach to education is far more stimulating than reading a text book. M&P Survey Equipment Ltd were key to our delivery – a great day all round".

For all your survey & engineering requirements whether it be sales, hire, service or repair, please contact M&P Survey Equipment Ltd for more information on 0151 357 1856 or visit their website: .mpsurvey.co.uk
