Xtend & Climb

The Clever New Alternative to the traditional extension ladder

- ▶ *Ideal for attic access, internal or external maintenance & decorating*
- ▶ *Strong and robust*
- ▶ *Easy to use*
- ▶ *Easily stored in a car boot or cupboard*
- ▶ *Safely extends to 3.8m and locks rung by rung*
- ▶ *Certified to EN131*

- ▶ Closed length – 0.76m
- ▶ Fully extended length – 3.8m
- ▶ Width – 0.48m
- ▶ Weight – 11kg
- ▶ Certified to EN131

The new Xtend & Climb telescopic ladder stores at a mere 0.76m and telescopes up to an amazing 3.8m. The compact design makes it easy to store, convenient to carry and simple to use – simply lift and lock to the desired height, complete your task and use the release catches to safely lower each section, without trapping any digits... easy!

Xtend & Climb is the perfect portable ladder and weighs only 11kg, which means that it will fit into any car boot or cupboard.

Because the Xtend & Climb opens and locks rung-by-rung, you only need to open it to the length required, giving much greater flexibility and manoeuvrability in confined spaces.

Certified to EN131 the Xtend & Climb is tremendously robust, with a tough anodised aluminium finish that is clean to the touch – an ideal piece of kit for working inside and out, at home, in the office or on site.

Xtend & Climb opens easily and safely from a compact 0.76m to a versatile 3.8m
